Subject: FW: Glyphosate US EPA document

Hi Kate

Here is the most recent document on Glyphosate. On page 15 has the cancer classification. The documentation is in the TXR 0008899. The work group had this document at their celebration. I think Yann has an electronic copy. It's also on the web
hope this helps

Regards
JR

Subject: Glyphosate US EPA document

Dear Jess,

I hope you are well and are enjoying springtime in Washington, DC!

I have a question regarding the most recent US EPA hazard or risk assessment document for glyphosate. Is this 1993 document indeed the most recent: http://www.epa.gov/oppsrrd1/reregistration/REDs/old_reds/glyphosate.pdf ? If not, might I ask you to send the most recent?

Thanks and best regards,

Kate

Subject: Greetings

Hi Kate

Reached home safe. My participation at the meeting was indeed an honor and a pleasure. It was good for the EPA to have learned the IARC process, and participated in the evaluation of pesticide chemicals. During my debriefing to upper management, a question was raised as to how one would get on as a member of the Work Group. I did not know the answer. So can you please provide me as to how one can participate as a member of the Work Group.

Wish you all the best.

Regards

Jess Rowland,

Deputy Director
Health Effects Division

Office of Pesticide Programs
