Subject: IARC Monographs

Dear all,

Ivan Rusyn and Matt Martin have very kindly informed us that they plan a presentation to you Friday on the IARC Monographs process and recent evaluations. We are very pleased that you will have this opportunity for discussion with these Volume 112 Working Group members; they have our utmost confidence. Indeed, we have greatly appreciated their outstanding contributions to the Volume 112 evaluations, and we extend our thanks to the US EPA for the participation of Matt and Peter Egeghy on the Working Group and also of Jess Rowland as a Representative.

I also wanted you to be aware that the glyphosate Monograph is undergoing accelerated production. It will be made available to national and international agencies in early July 2015, following fact- and reference-verification and editing processes. In the meantime, we have shared the full reference list for the glyphosate Monograph upon requests from several national and international agencies, for their internal use. As we understand that US EPA may be currently re-evaluating glyphosate, please do not hesitate to request this reference list.

Finally, if it would be of interest, we would be happy to provide a briefing from the IARC Monographs Programme on these recent evaluations. I will be in Washington, DC in mid-June for the [SOT-FDA colloquium](#) as one possible opportunity if so.

With kind regards,

Kate
