Yes I think that sounds like a good addition re the general uses of glyphosate. It's not just agricultural workers who are exposed.

Hi Kate and all,

Thank you very much for the draft. I added changes in the attached version revised by Hans: references by Koutros on malathion (Prostate cancer) have to be corrected as mentionned in the comments. I also have a question to Hans and Linn: would it be useful to mention that glyphosate is not only used in agriculture but also in urban areas (roads, public gardens,...) and in private gardens...?
All the best to you all,

Isabelle

Hi Kathryn,

The write up looks pretty good. In the attachment my comments in track changes in the word document. I missed a few lines (short paragraph) on the issues we wrote up on exposure assessment and the multiple exposure situations all epi-studies have to deal with. I think it would be good to have that in the Lancet Oncology as well.

Best and good luck with the submission, Hans

Subject: IARC Monograph vol 112- Lancet oncology article draft

Dear all,

We thank you again for your outstanding contributions to the IARC Monograph volume 112 meeting!

We provide for your review and comment no later than Monday COB in your time zone a draft of the Lancet Oncology article. We ask for your feedback using track changes, preferably using the google doc sent separately or in the appended Word file. Please turn on track changes before entering any suggested edits. We strongly prefer direct edits to the text but will attempt to address any comments as well.

Please be reminded that the information summarised herein is strictly embargoed until the Lancet

Oncology article is published online. We will be pleased to inform you when this has occurred.

My very best regards,

With thanks to you all,

Kate
