

Matt,  
thank you for looking.  
Also, have you seen my email with the feedback on Nours paper? It is not a bad review so I will be working to make revisions. Is your wih still to be taken off or can you reconsider?  
Thank you!

Subject: RE: ToxRefDB question

Sorry to take so long to get back to you on this. I must have completely overlooked it. I was just looking up your email address and saw this email buried.

Attached is the glyphosate data as entered into ToxRefDB for this study. It does NOT have the kidney effects entered.

Also, only with a quick glance, I do not see any mentioning of kidney effects; do you have a page number?

Matt

~~~~~

Matt Martin, PhD

The most recent release of toxrefdb is actually on our toxcast data download page. Apologies but we have had some issues maintaining versioning.

<http://epa.gov/ncct/toxcast/data.html>

Animal Toxicity Studies: Effects & Endpoints (Toxicity Reference Database – ToxRefDB files)

The full database flat file is  
toxrefdb\_study\_tg\_effect\_endpoint\_AUG2014\_FOR\_PUBLIC\_RELEASE.csv

Let me know if you have issues finding the Glyphosate data in the files.

Thanks,

Matt

**Subject:** ToxRefDB question

Dear Matt, Dear Ivan,

I hope you are both well. I have a basic (I.e., stupid) question on ToxRefDB. In searching on glyphosate, I arrive at the page below. It doesn't include all the studies mentioned in the draft, i.e., the study below. It also doesn't give the dose for the studies, or the effects....

Am I searching in the correct place/way? Any guidance appreciated.

Many thanks,

Kate
