Hi Ivan,

Great to see you in DC. I was certainly glad you were there. Overall, I thought it went well but do not think we have heard the last of Glyphosate.

Can you send me the final version of this manuscript for me to push through clearance (thanks for the reminder, ha)? I just have my edited version and an older draft.

Thanks,

Matt

**Importance:** High

Dear colleagues,

I do appreciate your assistance with this manuscript. Your feedback is greatly appreciated.

Thank you.

Ivan

**Subject:** Abdo et al (pesticides) manuscript

**Importance:** High

Colleagues,

Please find attached a manuscript for your editing that is based on Nour's last dissertation chapter. I was holding onto this hoping that gene expression experiment that we did on those cells would yield some additional information, but regretfully it would be difficult to fit in as the story is already quite multi-dimensional.

I would appreciate your critical read and edits. Please track changes and don't reply-all, just send them to me. I would appreciate hearing back from you within a week.

Yellow highlights mark figures/tables, so worry not about those. Blue highlights are for Barbara and Matt to address.

Thank you!

Ivan

PS I am thinking of "*Environment international*" as a place for this work.
