Kate,

I still posit that original title should stand to be consistent monograph-to-monograph. You may or may not have in vitro, genomics or other data for every monograph, so not to confuse the people who are used to chapter labels and data flow, you should stick to a most general title, your current one.

Ivan

Dear Matt, Dear all,

Matt, I like your proposal. In the future (maybe even for the vol 113 meeting??), publicly available genomics data could be included in this section too? :-)

The vol 112 aftermath has definitely been interesting! Although I turned down a cameo Dr. OZ, we've done many media interviews and stories are still appearing: <http://www.consumerreports.org/cro/news/2015/04/more-concerns-about-glyphosate-and-other-pesticides-in-produce/index.htm> . And this video may make you miss France: <https://www.youtube.com/watch?v=ovKw6YjqSfM>.

Best to all,

Bon weekend,

Kate

**Subject:** Title for Section 4.3

Dear all,

I hope you are well and enjoying Spring! It is lovely and sunny here in Lyon...

I seek your advice on a new name for IARC Monograph Section 4.3, which as you may recollect covers Tox21, SAR and any other high-throughput/high output data. The current (uninformative) name is below, as are other options; open to your other ideas, of course!

High throughput screening data

High-throughput screening and “omics” data

Toxicogenomic data (does anyone know what this means?)

**4.3 Data relevant to comparisons across agents and end-points.** If important to the evaluation, structure–activity relationships, any additional high-throughput/output data, etc., are summarized.

Best regards to you all,

Kate

**Kate Z. Guyton PhD DABT**
