**Supplement shall be filed by Defendant within 15 days. See below.**

The undersigned has been working through the documents filed under seal for *in camera* review. The index supplied by Defendant refers to each document by a unique document number. The actual documents are Bates numbered but are not identified and tabbed by document number. It is difficult for the court to correlate document numbers to Bates numbers. The court requests that for those documents that remain in dispute as identified in Plaintiffs' Response to Privilege Log, Defendant submit a table showing the Bates numbers that correspond to document numbers.
