

REQUEST UNDER THE FREEDOM OF INFORMATION ACT

June 9, 2017

BY ELECTRONIC MAIL — stockton@niehs.nih.gov

Freedom of Information Office
NIEHS
P.O. Box 12233
Research Triangle Park, NC 27709

RE: FOIA Request – 2005 Agreement/Contract 291-2005-55535

To NIEHS Freedom of Information Officer,

On behalf of the Free Market Environmental Law Clinic (FME Law) and the Energy & Environment Legal Institute (E&E Legal), please accept this request pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552 *et seq.* FME Law and E&E Legal are non-profit public policy institutes organized under section 501(c)3 of the tax code and with research, investigative journalism and publication functions, as well as a transparency initiative seeking public records relating to environmental and energy policy and how policymakers use public resources, all of which include broad dissemination of public information obtained under open records and freedom of information laws. Please provide us, within twenty working days,¹ copies of all of the following described record:

NIH Agreement/Contract: 291-2005-55535 with the Ramazzini Institute, also known as the B. Ramazzini Foundation, European Foundation of Oncology and Environmental

¹ See *Citizens for Responsible Ethics in Washington v. Federal Election Commission*, 711 F.3d 180, 186 (D.C. Cir. 2013), and discussion, *infra*.

Sciences “B.Ramazzini,” Ramazzini Foundation, European Foundation of Oncology and Environmental Sciences, and Bernardino Ramazzini National Institute for the Study and Control of Tumors and Environmental Diseases.

We request all attachments, as applicable, mindful also of the DC Circuit’s ruling in *American Immigration Lawyers Association v. Executive Office for Immigration Review* (D.C. Cir. July 29, 2016).²

This relationship is the subject of foreign media inquiries and widespread domestic news coverage,³ principally raising questions about the federal government’s work on risk assessments including that EPA hurriedly removed from its website the Final Report of the Cancer Assessment Review Committee on Glyphosate, a report whose conclusions run counter to the 2015 IARC Monograph 112 on Glyphosate.⁴ A summary of the IARC study was published in *The Lancet Oncology* (Guyton, K. Z. et al. *Lancet Oncol.* <http://dx.doi.org/10.1016/>

² [https://www.cadc.uscourts.gov/internet/opinions.nsf/BCEF1EB7B6536FD285257FFF0054F06F/\\$file/15-5201-1627649.pdf](https://www.cadc.uscourts.gov/internet/opinions.nsf/BCEF1EB7B6536FD285257FFF0054F06F/$file/15-5201-1627649.pdf), “we find no statutory basis for redacting ostensibly non-responsive information from a record deemed responsive. Under the statutory framework, once the government concludes that a particular record is responsive to a disclosure request, the sole basis on which it may withhold particular information within that record is if the information falls within one of the statutory exemptions from FOIA’s disclosure mandate”.

³ See e.g., P.J. Huffstutter, EPA takes offline report that says glyphosate not likely carcinogenic, Reuters, May 2, 2016; Carey Gillam, What is going on with glyphosate? EPA’s odd handling of controversial chemical, Huffington Post, May 2, 2016; Mairead McGuinness, First shots fired in a renewed battle over agri chemicals, Irish Independent, May 3, 2016; Timothy Cama and Devin Henry, EPA accidentally posts pesticide review, The Hill, May 2, 2016; Michael Bastasch, EPA Quickly Takes Study Offline Showing No Evidence Weed Killer Causes Cancer, Daily Caller, May 3, 2016; Marc Heller, E&E News, May 5, 2016.

⁴ International Agency for Research on Cancer Volume 112: Some organophosphate insecticides and herbicides: tetrachlorvinphos, parathion, malathion, diazinon and glyphosate. IARC Working Group. Lyon; 3–10 March 2015. *IARC Monogr Eval Carcinog Risk Chem Hum.*

S1470-2045(15)70134-8 (2015). It also follows reports that the IARC Monograph may be the product of and/or materially influenced by unalterably closed minds and/or materially conflicted parties and, in sum, have resulted from insufficiently unbiased deliberations.

This was followed by a spate of decisions among apparently intertwined groups (which have obvious government agency staff and participant overlap) to undertake similar efforts, for no readily apparent reason for the coincidences. We note this has also drawn the interest of congressional oversight.

Public records demonstrate that outside parties gave a “heads up” to a public call for NTP to engage in a movement to revisit “settled” science” on glyphosate while also indicating that the Ramazzini Institute or Foundation (Collegium Ramazzini or Fondazione Europea Bernardino Ramazzini) was among that crowd.

NTP’s website notes that “NTP is increasingly active in developing international partnerships to establish effective means for avoiding duplicative efforts in toxicology testing. NTP is collaborating with Ramazzini on standardization of the conduct and reporting of laboratory studies on the health effects associated with long-term exposure to environmental agents. They share common interest in identifying agents that cause cancer and in understanding the interaction and synergism between genetic susceptibility to cancer and exposure to cancer-causing agents.” <https://ntp.niehs.nih.gov/about/org/partnerships/index.html> The contracts cited, above, relate to this relationship.

For these and other reasons requesters are interested in the relationships between NIEHS and NTP, including most recently and leading up to the IARC Monograph among other efforts as

just described, and specifically how these relationships might have impacted, or what they show about, certain agency actions. For these same reasons we are interested in the relationship between NIH and Ramazzini Institute which it funds directly and through Ramazzini fellows.

We are interested in the nature of these intertwining relationships, and taxpayer support of certain institutions/projects. We note that Ramazzini also presents itself by several names and through several conduits, and seek information to help provide clarity to certain questions we are interested in how much taxpayer money goes to this institution, and how.

Plainly, the issue is of great public interest, as well as being highly policy-relevant.

NIH Owes Requesters a Reasonable Search, Including a Non-Conflicted Search

FOIA requires an agency to make a reasonable search of records, judged by the specific facts surrounding each request. *See e.g., Itrurralde v. Comptroller of the Currency*, 315 F.3d 311, 315 (D.C. Cir. 2003); *Steinberg v. DOJ*, 23 F.3d 548, 551 (D.C. Cir. 1994).

It is well-settled that Congress, through FOIA, “sought ‘to open agency action to the light of public scrutiny.’” *DOJ v. Reporters Comm. for Freedom of Press*, 498 U.S. 749, 772 (1989) (quoting *Dep’t of Air Force v. Rose*, 425 U.S. 353, 372 (1976)). The legislative history is replete with reference to the “‘general philosophy of full agency disclosure’” that animates the statute. *Rose*, 425 U.S. at 360 (quoting S.Rep. No. 813, 89th Cong., 2nd Sess., 3 (1965)). The act is designed to “pierce the veil of administrative secrecy and to open agency action to the light of scrutiny.” *Department of the Air Force v. Rose*, 425 U.S. 352 (1976). It is a transparency-forcing law, consistent with “the basic policy that disclosure, not secrecy, is the dominant objective of the Act.” *Id.*

A search must be “reasonably calculated to uncover all relevant documents.” *See, e.g., Nation Magazine v. U.S. Customs Serv.*, 71 F.3d 885, 890 (D.C. Cir. 1995). In determining whether or not a search is “reasonable,” courts have been mindful of the purpose of FOIA to bring about the broadest possible disclosure. *See Campbell v. DOJ*, 164 F.3d 20, 27 (D.C. Cir. 1999) (“reasonableness” is assessed “consistent with congressional intent tilting the scale in favor of disclosure”).

The reasonableness of the search activity is determined ad hoc but there are rules, including that the search must be conducted free from conflict of interest. (In searching for relevant documents, agencies have a duty “to ensure that abuse and conflicts of interest do not occur.” *Cuban v. S.E.C.*, 744 F.Supp.2d 60, 72 (D.D.C. 2010). *See also Kempker-Cloyd v. Department of Justice*, No. 97-cv-253, 1999 U.S. Dist. LEXIS 4813, at *12, *24 (W.D. Mich. Mar. 12, 1999) (holding that the purpose of FOIA is defeated if employees can simply assert that records are personal without agency review; faulting the Department of Justice for the fact that it “was aware that employee had withheld records as ‘personal’ but did not require that ‘he submit those records for review’ by the Department.).

Withholding and Redaction

Please identify and inform us of all responsive or potentially responsive records within the statutorily prescribed time, and the basis of any claimed exemptions or privilege and to which specific responsive or potentially responsive record(s) such objection applies.

If NIH claims any records or portions thereof are exempt under one of FOIA’s discretionary exemptions we request you exercise that discretion and release them consistent

with, e.g., statements by President Obama and Attorney General that **“The old rules said that if there was a defensible argument for not disclosing something to the American people, then it should not be disclosed. That era is now over, starting today”** (President Barack Obama, January 21, 2009), and **“Under the Attorney General’s Guidelines, agencies are encouraged to make discretionary releases. Thus, even if an exemption would apply to a record, discretionary disclosures are encouraged.** Such releases are possible for records covered by a number of FOIA exemptions, including Exemptions 2, 5, 7, 8, and 9, but they will be most applicable under Exemption 5.” (Department of Justice, Office of Information Policy, OIP Guidance, “Creating a ‘New Era of Open Government’”). Moreover, we note that information cannot be exempt from production as “proprietary” information if it was widely disseminated outside NIH and any organization with proprietary rights to the data in question.

Nonetheless, if your office takes the position that any portion of the requested records is exempt from disclosure, please inform us of the basis of any partial denials or redactions. In the event that some portions of the requested records are properly exempt from disclosure, please disclose any reasonably segregable, non-exempt portions of the requested records. See 5 U.S.C. §552(b).

Further, we request that you provide us with an index of those documents as required under *Vaughn v. Rosen*, 484 F.2d 820 (D.C. Cir. 1973), with sufficient specificity “to permit a reasoned judgment as to whether the material is actually exempt under FOIA” pursuant to *Founding Church of Scientology v. Bell*, 603 F.2d 945, 959 (D.C. Cir. 1979), and “describ[ing] each document or portion thereof withheld, and for each withholding it must discuss the consequences of

supplying the sought-after information.” *King v. Department of Justice*, 830 F.2d 210, 223-24 (D.C. Cir. 1987).

We remind NIH it cannot withhold entire documents rather than produce their “factual content” and redacting any confidential advice and opinions. As the D.C. Circuit Court of Appeals noted, the agency must “describe the factual content of the documents and disclose it or provide an adequate justification for concluding that it is not segregable from the exempt portions of the documents.” *Id.* at 254 n.28. As an example of how entire records should not be withheld when there is reasonably segregable information, we note that basic identifying information (who, what, when) is not “deliberative”. As the courts have emphasized, “the deliberative process privilege directly protects advice and opinions and *does not permit the nondisclosure of underlying facts* unless they would indirectly reveal the advice, opinions, and evaluations circulated within the agency as part of its decision-making process.” *See Mead Data Central v. Department of the Air Force*, 566 F.2d 242, 254 n.28 (D.C. Cir. 1977) (emphasis added).

If it is your position that a document contains non-exempt segments and that those non-exempt segments are so dispersed throughout the documents as to make segregation impossible, please state what portion of the document is non-exempt and how the material is dispersed through the document. *See Mead Data Central v. Department of the Air Force*, 455 F.2d at 261.

Claims of non-segregability must be made with the same practical detail as required for claims of exemption in a *Vaughn* index. If a request is denied in whole, please state specifically that it is not reasonable to segregate portions of the record for release.

Satisfying this request contemplates providing copies of documents, in electronic format if you possess them as such, otherwise photocopies are acceptable.

Please provide responsive documents in complete form, with any appendices or attachments as the case may be.

Request for Fee Waiver — Three in the Alternative, NIH Must Consider All

This discussion through page 23 is detailed as a result of our recent experience of agencies improperly using denial of fee waivers to impose an economic barrier to access, an improper means of delaying or otherwise denying access to public records, despite our history of regularly obtaining fee waivers. We are not alone in this experience.⁵ *It is only relevant if your agency considers denying our fee waiver.*

A. Pursuant to the Public Interest, 5 U.S.C. § 522(a)(4)(A)(iii)

1. Subject of the Request

Potentially responsive records will inform the public about certain NIH activities relating to interaction with foreign governmental and/or international agencies and its treatment of data relating to glyphosate. As previously discussed, the information sought will provide important insights into the described public policy-related issues. The requested records thus clearly concern the operations and activities of government.

⁵ See February 21, 2012 letter from public interest or transparency groups to four federal agencies requesting records regarding a newly developed pattern of fee waiver denials and imposition of “exorbitant fees” under FOIA as a barrier to access, available at <http://images.politico.com/global/2012/03/acluefffeewvr-foialtr.pdf>; see also *National Security Counselors v. CIA* (CV: 12-cv-00284(BAH), filed D.D.C Feb. 22, 2012); see also “Groups Protest CIA’s Covert Attack on Public Access,” OpenTheGovernment.org, February 23, 2012, <http://www.openthegovernment.org/node/3372>.

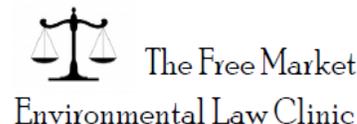

We emphasize that a requester need not demonstrate that the records would contain any particular evidence, such as of misconduct. Instead, the question is whether the requested information is likely to contribute significantly to public understanding of the operations or activities of the government, period. *See Judicial Watch v. Rosotti*, 326 F. 3d 1309, 1314 (D.C.-Cir. 2003).

2. Informative value of the information

FOIA requesters and other individuals and organizations concerned with good government and otherwise concerned with wise use of taxpayer money, and sound environmental and energy policy, have a clear interest in this topic. The widespread media interest in recent federal government actions relating to Glyphosate, as well as our information and belief about outside interests' participation in the U.S. taxpayer-funded IARC panel further demonstrates the significant public interest in this information. The agency's copies are public records. The public has no other means to secure this information other than through the Freedom of Information Act. This makes the information sought highly likely to significantly contribute to an understanding of government operations and activities.

3. Contribution to an understanding by the general public.

Requesters have a record of obtaining and producing information as would a news media outlet and as a legal/policy organization that broadly disseminates information on important energy and environmental policy related issues, including how various agencies related to energy and environmental policies conduct themselves related to transparency efforts from outside organizations such as E&E Legal and FME Law. In addition to being functionally a news outlet,

both requesters have disseminated their work in a manner that results in coverage by national news outlets on television, in national newspapers, and in policy newsletters from state and National policy institutes.⁶ Requesters have a recognized interest in and reputation for leading relevant policy debates and expertise in the subject of energy and environment-related regulatory policies, including how related agencies respond to transparency efforts, and they and their staffs' publications demonstrate requesters have the "specialized knowledge" and "ability and

⁶ Print examples, only, to the exclusion of dozens of national electronic media broadcasts, include, *e.g.*, Dawn Reeves, EPA Emails Reveal Push To End State Air Group's Contract Over Conflict, *INSIDE EPA*, Aug. 14, 2013; Editorial, Public interest group sues EPA for FOIA delays, claims agency ordered officials to ignore requests, *WASHINGTON EXAMINER*, Jan. 28, 2013; Michal Conger, Emails show green group influence on EPA coal rule, *WASHINGTON EXAMINER*, Jan. 9, 2014; C.J. Hickey, Legality of EPA Rules Questioned by Environmental Litigators, *NEWSMAX*, March 21, 2014; Michael Bastasch, Confidential document reveals the Sierra Club's plan to shut down the coal industry, *DAILY CALLER*, Mar. 26, 2014; Michael Bastasch, Conservative group sues EPA over its 'IRS-like' tactics, *The Daily Caller*, Apr. 1, 2014; Stephen Dinan, Conservative group sues EPA over open-records requests, *WASHINGTON TIMES*, Apr. 1, 2014.

intention” to broadly disseminate the information requested in the broad manner, and to do so in a manner that significantly contributes to the understanding of the “public-at-large.”

4. Significance to Public Understanding

As explained above, only by NIH releasing this information will public interest groups such as requesters, the media, and the public at large see these terms first hand and draw their own conclusions concerning the interactions and relationship between international agencies and the NIEHS (and NTP) and EPA.

B. Commercial Interest of Requesters

1. No Commercial Interest

Requesters are organized and recognized by the Internal Revenue Service as 501(c)(3) educational organizations. Requesters do not charge for copies of reports. The requested information is not sought for a commercial purpose and cannot result in any form of commercial gain to requesters, who have absolutely no commercial interest in the records.

2. Primary Interest in Disclosure

With no possible commercial interest in these records, an assessment of that non-existent interest is not required in any balancing test with the public’s interest. Requesters also satisfy this factor as news media outlets.⁷

As such and also for the following reasons requesters seek waiver or reduction of all costs pursuant to 5 U.S.C. § 552(a)(4)(A)(iii) (“Documents shall be furnished without any

⁷ See discussion below.

charge...if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of government and is not primarily in the commercial interest of the requester”) (As we request documents in electronic format, there should be no copying costs).

As non-commercial requesters, requesters are entitled to liberal construction of the fee waiver standards. 5 U.S.C. § 552(a)(4)(A)(iii), *Perkins v. U.S. Department of Veterans Affairs*, 754 F. Supp. 2d 1 (D.D.C. 2010). Specifically, the public interest fee waiver provision “is to be liberally construed in favor of waivers for noncommercial requesters.” *McClellan Ecological Seepage Situation v. Carlucci*, 835 F. 2d 1284, 2184 (9th Cir. 1987). FOIA is aimed in large part at promoting active oversight roles of watchdog public advocacy groups. “The legislative history of the fee waiver provision reveals that it was added to FOIA ‘in an attempt to prevent government agencies from using high fees to discourage certain types of requesters, and requests,’ in particular those from journalists, scholars and nonprofit public interest groups.” *Better Government Ass'n v. State*, 780 F.2d 86, 88-89 (D.C. Cir. 1986)(fee waiver intended to benefit public interest watchdogs), citing to *Ettlinger v. FBI*, 596 F. Supp.867, 872 (D.Mass.

1984); SEN. COMM. ON THE JUDICIARY, AMENDING THE FOIA, S.REP. NO. 854, 93rd Cong., 2d Sess. 11-12 (1974)).⁸

Congress enacted FOIA clearly intending that “fees should not be used for the purpose of discouraging requests for information or as obstacles to disclosure of requested information.” *Ettlinger v. FBI*, citing Conf. Comm. Rep., H.R. Rep. No. 1380, 93d Cong., 2d Sess. 8 (1974) at 8. Improper refusal of fees as a means of withholding records from a FOIA requester constitutes improper withholding. *Ettlinger v. FBI*. Given this, “insofar as ...[agency] guidelines and standards in question act to discourage FOIA requests and to impede access to information for precisely those groups Congress intended to aid by the fee waiver provision, they inflict a continuing hardship on the non-profit public interest groups who depend on FOIA to supply their lifeblood -- information.” *Better Gov’t v. State* at 94 (internal citations omitted). The courts therefore will not permit such application of FOIA requirements that “‘chill’ the ability and willingness of their organizations to engage in activity that is not only voluntary, but that Congress explicitly wished to encourage.” *Id.*

⁸ This was grounded in the recognition that the two plaintiffs in that merged appeal were, like requesters, public interest non-profits that “rely heavily and frequently on FOIA and its fee waiver provision to conduct the investigations that are essential to the performance of certain of their primary institutional activities -- publicizing governmental choices and highlighting possible abuses that otherwise might go undisputed and thus unchallenged. These investigations are the necessary prerequisites to the fundamental publicizing and mobilizing functions of these organizations. Access to information through FOIA is vital to their organizational missions.” *Better Gov’t v. State* at 93. They therefore, like requesters, “routinely make FOIA requests that potentially would not be made absent a fee waiver provision”, requiring the court to consider the “Congressional determination that such constraints should not impede the access to information for appellants such as these.” *Id.*

As such, agency implementing regulations may not facially or in practice interpret FOIA's fee waiver provision in a way creating a fee barrier for requesters. "This is in keeping with the statute's purpose, which is 'to remove the roadblocks and technicalities which have been used by . . . agencies to deny waivers.'" *Citizens for Responsibility & Ethics in Washington v. U.S. Dep't of Educ.*, 593 F. Supp. 261, 268 (D.D.C.2009), *citing to McClellan Ecological Seepage Situation v. Carlucci*, 835 F.2d 1282, 1284 (9th.Cir. 1987)(quoting 132 Cong. Rec. S16496 (Oct. 15, 1986) (statement of Sen. Leahy). Requesters' ability to utilize FOIA -- as well as many nonprofit organizations, educational institutions and news media who will benefit from disclosure -- depends on its ability to obtain fee waivers. For this reason, "Congress explicitly recognized the importance and the difficulty of access to governmental documents for such typically under-funded organizations and individuals when it enacted the 'public benefit' test for FOIA fee waivers. This waiver provision was added to FOIA 'in an attempt to prevent government agencies from using high fees to discourage certain types of requesters and requests,' in a clear reference to requests from journalists, scholars and, most importantly for our purposes, nonprofit public interest groups. Congress made clear its intent that fees should not be utilized to discourage requests or to place obstacles in the way of such disclosure, forbidding the use of fees as "toll gates" on the public access road to information.'" *Better Gov't Ass'n v. Department of State* 780 F.2d 86, 94 (D.C. Cir. 1986). As the Better Government court also recognized, public interest groups employ FOIA for activities "essential to the performance of certain of their primary institutional activities — publicizing governmental choices and highlighting possible abuses that otherwise might go undisputed and thus unchallenged. These

investigations are the necessary prerequisites to the fundamental publicizing and mobilizing functions of these organizations. Access to information through FOIA is vital to their organizational missions.” That is true in the instant matter as well.

Courts have noted FOIA’s legislative history to find that a fee waiver request is likely to pass muster “if the information disclosed is new; supports *public* oversight of agency operations, including the quality of agency activities and the effects of agency policy or regulations on public health or safety; *or, otherwise confirms or clarifies data on past or present operations of the government.*” *McClellan Ecological Seepage Situation v. Carlucci*, 835 F.2d at 1284-1286. (*emphasis added*). This information request meets that description, for reasons both obvious and specified. The subject matter of the requested records specifically concerns identifiable operations or activities of the government. The requested records, pertain to EPA’s activities of great public interest, as previously described. They also directly relate to high-level promises by the President of the United States and the Attorney General to be “the most transparent administration ever.” This transparency promise, in its serial incarnations, demanded and spawned widespread media coverage, and then of the reality of the administration’s transparency efforts, and numerous transparency-oriented groups reporting on this performance, prompting further media and public interest (*see, e.g.*, an internet search of “study Obama transparency”).

As such, requesters have stated “with reasonable specificity that their request pertains to “operations of the government,” and “the informative value of a request depends not on there being certainty of what the documents will reveal, but rather on the requesting party having explained with reasonable specificity how those documents would increase public knowledge of

the functions of government.” *Citizens for Responsibility & Ethics in Washington v. U.S. Dep’t of Health and Human Services*, 481 F. Supp. 2d 99, 107-109 (D.D.C. 2006).

In The Alternative, E&E Legal and FME Law Qualify as Media Organizations under 5 U.S.C. § 522(a)(4)(A)(ii)(II)

As authorized under FOIA, NIH must waive fees for representatives of the news media. *See* 5 U.S.C. § 552(a)(4)(A)(ii)(II). In the alternative, if NIH denies requesters’ fee waiver under FOIA’s public interest prong, E&E Legal and FM Law meet the criteria for a fee waiver as a representative of the news media; also, FME Law meets this test, as a “representative of the news media” is defined as any person actively gathering information about current events or of current interest to the public (“news”) for an entity that is organized and operated to publish or broadcast news to the public. Office of Management and Budget Guidelines, 52 Fed. Reg. 10012, 10018 (March 27, 1987).

The White House Office of Management and Budget (OMB) published guidance on its interpretation of the term “representative of the news media.” OMB includes in this category publishers of newsletters and similar periodicals, publishers of books, and radio and television broadcasting. However, “labels and titles alone do not govern; the organizations’ substantive activities control.” *Elec. Privacy Info. Ctr. v. DOD*, 241 F. Supp. 2d 5, 21 (D.C.D.C. 2003).

Courts have affirmed that non-profit requesters like E&E Legal and FME Law who are not traditional news media outlets can qualify as representatives of the new media for purposes of the FOIA. *See ACLU of Washington v. U.S. Dep’t of Justice*, No. C09-0642RSL, 2011, 2011 U.S. Dist. LEXIS 26047 at *32 (W.D. Wash. Mar. 10, 2011). *See also, Serv. Women’s Action*

Network v. DOD, 2012 U.S. Dist. Lexis 45292 (D. Conn., Mar. 30, 2012). The courts use a three prong test of an organization's activities. A representative of the news media is a person or entity that (1) gathers information of potential interest to a segment of the public; (2) uses its editorial skills to turn the raw materials into a distinct work; and (3) distributes that work to an audience. *Nat'l Sec. Archive v. U.S. Dep't of Def.*, 880 F.2d 1381, 1387, 279 U.S. App. D.C. 308 (D.C. Cir. 1989). This reflects OMB's regulatory preamble language indicating a representative of the news media must "perform an active rather than passive role in dissemination." OMB Guidelines, 52 Fed. Reg. at 10015. Requesters meet all three prongs.

1. E&E Legal and FME Law seek information of interest to a broad segment of the public.

E&E Legal and FME Law have taken a leadership role of late in assessing various agencies compliance with the President's commitment to transparency. Evidence that such information is of potential interest to a segment of the public is manifest in the use of this information by other publication entities, lawmakers and the public, a point we make explicit in this request. E&E Legal and FME Law has an established practice of using FOIA to educate the public, lawmakers and news media about the government's operations and, in particular, has brought to light important information about policies grounded in energy and environmental policy, as well as how agencies react to transparency efforts.

2. E&E Legal and staff use their editorial skills to turn the raw materials into distinct work

E&E Legal uses editorial skills to turn raw materials into distinct work published by its staff and affiliated professionals. Thomas Tanton, E&E Senior Fellow, authored E&E Legal's report entitled "The Hidden Cost of Wind Energy." E&E Legal and FME Law staff not only has

a lengthy history of turning raw materials into distinct works, and specifically news articles, they have done so as staff to E&E Legal and for E&E Legal publications, as discussed above, and plan on doing so again, using, in part, the documents received under this request.

3. E&E Legal and FME Law distributes that work to an audience

The key to whether an organization merits “media” fee waiver is whether a group publishes, as E&E Legal most surely does. In *National Security Archive v. Department of Defense*, 880 F.2d 1381 (D.C. Cir. 1989), the D.C. Circuit wrote:

The relevant legislative history is simple to state: because one of the purposes of FOIA is to encourage the dissemination of information in Government files, as Senator Leahy (a sponsor) said: “It is critical that the phrase representative of the news media’ be broadly interpreted if the act is to work as expected.... In fact, any person or organization which regularly publishes or disseminates information to the public ... should qualify for waivers as a `representative of the news media.’” *Id.* at 1385-86.

As the court in *Electronic Privacy Information Center v. Department of Defense*, 241 F. Supp. 2d 5 (D.D.C. 2003) noted, this test is met not only by outlets in the business of publishing such as newspapers; instead, citing to the *National Security Archives* court, it noted one key fact is determinative, the “plan to act, in essence, as a publisher, both in print and other media.” *EPIC v. DOD*, 241 F.Supp.2d at 10 (emphases added). “In short, the court of appeals in *National Security Archive* held that ‘[a] representative of the news media is, in essence, a person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw material into a distinct work, and distributes that work to an audience.’” *Id.* at 11.

See also, Media Access Project v. FCC, 883 F.2d 1063, 1065 (D.C. Cir. 1989).

Specifically, E&E Legal is a publisher of books and reports that address matters associated with energy, the environment and federal bureaucratic pathologies.⁹ E&E Legal published Greg Walcher’s “Smoking Them Out – The Theft of the Environment and How to Take it Back.” It published seven reports on the true cost of renewable portfolio standards.¹⁰ FME Law and E&E Legal co-published a legal treatise “Protecting Federalism and State Sovereignty through Anti-Commandeering Litigation.” In addition, E&E Legal publishes a quarterly newsletter entitled E&E Legal Letters in which its General Counsel, Senior Legal Fellow Horner, staff attorneys and guest experts author an informative and educational article on an aspect of the law that emerges as part of E&E Legal’s activities, including its transparency initiative.¹¹

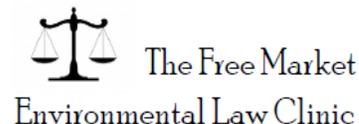

E&E Legal publishes materials based upon its research via print and electronic media, as well as in newsletters to legislators, education professionals, and other interested parties.¹² FME Law publishes scholarly works and contributes to non-scholarly media as experts on bureaucratic

⁹ Requesters point to their website for examples of its reports and publications. See http://eelegal.org/?page_id=2070.

¹⁰ See True Cost of Renewable Portfolio Standards, http://eelegal.org/?page_id=1734.

¹¹ See http://eelegal.org/?page_id=1798.

¹² See *EPIC v. DOD*, 241 F.Supp.2d 5 (D.D.C. 2003) (court ruled that the publisher of a bi-weekly electronic newsletter qualified as the media, entitling it to a waiver of fees on its FOIA request); *Forest Guardians v. U.S. Dept. of Interior*, 416 F.3d 1173, 1181-82 (10th Cir. 2005) (fee waiver granted for group that “aims to place the information on the Internet”; “Congress intended the courts to liberally construe the fee waiver requests of noncommercial entities”).

governmental practices.¹³ Those activities are in fulfillment of E&E Legal and FME Law’s purposes and missions. We intend to disseminate the information gathered by this request to the public at large and at no cost through one or more of the following: (a) newsletters; (b) opinion pieces in newspapers or magazines; (c) E&E Legal and FME Law’s websites; (d) in-house publications for public dissemination; (e) scholarly articles prepared for publication in peer-reviewed law journals (f) other electronic journals, including blogs to which our professionals contribute; (g) local and syndicated radio programs dedicated to discussing public policy; (h) to the extent that Congress or states engaged in relevant oversight or related legislative or judicial activities find that which is received noteworthy, it will become part of the public record on deliberations of the legislative branches of the federal and state governments on the relevant issues. E&E Legal and FME Law staffs also intend to disseminate the information gathered by this request via media appearances.

E&E Legal, with FME Law’s assistance, has produced two extensive reports, one on collusion between EPA and environmentalist pressure groups in its “war on coal”, and another on what our and similar groups’ use of FOIA has revealed about EPA operations and activities, more broadly. E&E Legal has conducted several studies on the operation of government, government ethics and the degree to which EPA follows its own rules and laws controlling its administrative activities.

¹³ *See e.g.*, FME Law Director participation on a panel dealing with use of FOIA with respect to scientific endeavors, most particularly the instant requesters’, sponsored by the National Academy of Sciences and George Washington University (April 1, 2014, Washington D.C.), relevant findings of which scholarly research E&E Legal intends to continue publishing in its publications.

E&E Legal’s publication of books, reports and newsletters far surpasses the publishing plan that was, standing alone, sufficient in *National Security Archive, v. Dep’t of Defense*, 880 F. 2d at 1386 (tax-exempt corporations achieve news media status through publication activities, including being a publisher of periodicals such as the E&E Legal Letter). *See also, Elec. Privacy Info. Ctr. v. DOD*, 241 F. Supp. 2d at 21-22 & 24-25 (tax-exempt corporations achieve news media status through publication activities, including being a publisher of periodicals such as the E&E Legal Letter); and *Id.* at 27 (“The fact that EPIC’s newsletter is disseminated via the Internet to subscribers’ e-mail addresses does not change the analysis.”); and see, *Media Access Project v. FCC*, 883 F.2d 1063, 1070 (D.C. Cir. 1989) (“In the case sub judice, the Commission virtually concedes that petitioners [People for the American Way] and [Union of Concerned Scientists] would qualify for preferred status as representatives of the news media” due to their “regular publication of a newsletter or periodical.”).

In addition to print publications, E&E Legal and FME Law professionals appear regularly on national television and national and local radio shows to discuss their work on matters of energy and environmental policy.

We conclude by noting, “In short, the court of appeals in *National Security Archive* held that ‘[a] representative of the news media is, in essence, a person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw material into a distinct work, and distributes that work to an audience.’” *EPIC*, 241 F.Supp. at

11.¹⁴ As already discussed with extensive supporting precedent, government information is of critical importance to the nonprofit policy advocacy groups engaged on these relevant issues, news media covering the issues, and others concerned with Agency activities in this controversial area or, as the Supreme Court once noted, what their government is up to.

For these reasons, requester E&E Legal and FME Law qualify as “representatives of the news media” under the statutory definition, because each organization routinely gathers information of interest to the public, uses editorial skills to turn it into distinct work, and distributes that work to the public. *See Electronic Privacy Information Center v. Department of Defense*, 241 F.Supp. 2d 5 (D.D.C. 2003)(non-profit organization that gathered information and published it in newsletters and otherwise for general distribution qualified as representative of news media for purpose of limiting fees). Courts have reaffirmed that non-profit requesters who are not traditional news media outlets can qualify as representatives of the new media for purposes of the FOIA, including after the 2005 amendments to FOIA. *See ACLU of Washington v. U.S. Dep’t of Justice*, No. C09-0642RSL, 2011, 2011 U.S. Dist. LEXIS 26047 at *32 (W.D. Wash. Mar. 10, 2011). *See also Serv. Women’s Action Network v. DOD*, 2012 U.S. Dist. Lexis 45292 (D. Conn., Mar. 30, 2012). Because E&E Legal meets each prong of the *Nat’l Sec. Archive* test, it qualifies as a representative of the news media and a fee waiver on that basis.

¹⁴ *See also, Forest Guardians v. U.S. Dept. of Interior*, 416 F.3d 1173, 1181-82 (10th Cir. 2005) (fee waiver granted for group that “aims to place the information on the Internet”; “Congress intended the courts to liberally construe the fee waiver requests of noncommercial entities”).

In the Alternative, FME Law Qualifies as an Educational Institution under 5 U.S.C. § 522(a)(4)(ii)(II)

In similar measure, FME Law qualifies as an educational institution. Under OMB guidance, an institution of professional education or an institution of vocational education, which operate a program or programs of scholarly research qualifies for a fee waiver under FOIA.¹⁵

FME Law provides education to law students, its Director is an Adjunct Professor of Law at George Mason University School of Law, it provides continuing legal education to attorneys in Virginia (a vocational education function) and it conducts a program of research on bureaucratic pathologies and Constitutional restraints to federal government overreach. These facts reflect the exact formulation for qualification for fee waiver under 5 U.S.C. §522(a)(4)(A)(ii)(II), as explained by the White House Office of Management and Budget. Accordingly, any fees charged under this categorization must be limited to duplication costs. The records requested are available electronically and are requested in electronic format; as such, there are no duplication costs other than the cost of a compact disc(s).

NIH must address this alternate basis for fee waiver in the event it denies fee waiver on the basis of the public interest. Failure to do is *prima facie* arbitrary and capricious.

CONCLUSION

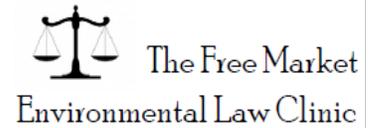

We expect the you to release within the statutory period of time all segregable portions of responsive records containing properly exempt information, and to provide information that may be withheld under FOIA's discretionary provisions and otherwise proceed with a bias toward dis-

¹⁵ See 52 Fed. Reg. 10014 (March 27, 1987).

closure, consistent with the law's clear intent, judicial precedent affirming this bias, and President Obama's directive to all federal agencies on January 26, 2009. Memo to the Heads of Exec. Offices and Agencies, Freedom of Information Act, 74 Fed. Reg. 4683 (Jan. 26, 2009) ("The Freedom of Information Act should be administered with a clear presumption: in the face of doubt, openness prevails. The Government should not keep information confidential merely because public officials might be embarrassed by disclosure, or because of speculative or abstract fears").

FOIA specifically requires you to immediately notify requesters with a particularized and substantive determination, and of its determination and its reasoning, as well as requesters' right to appeal; further, FOIA's unusual circumstances safety valve to extend time to make a determination, and its exceptional circumstances safety valve providing additional time for a diligent agency to complete its review of records, indicate that responsive documents must be collected, examined, and reviewed in order to constitute a determination. *See CREW v. FEC*, 711 F.3d 180, 186 (D.C. Cir. 2013). *See also Muttitt v. U.S. Central Command*, 813 F. Supp. 2d 221; 2011 U.S. Dist. LEXIS 110396 at *14 (D.D.C. Sept. 28, 2011) (addressing "the statutory requirement that [agencies] provide estimated dates of completion"). We request a rolling production of records, should it be necessary, such that the agency furnishes records to undersigned counsel's attention as soon as they are identified, preferably electronically, but as necessary in hard copy to his attention.

We inform NIH of our intention to protect our appellate rights on this matter at the earliest date should NIH not comply with FOIA per, e.g., *CREW v. FEC*. If you have any questions please do not hesitate to contact the undersigned.

Respectfully submitted,
